

GT Style Pedestal Rear Spoiler – Black (99-04 All) Installation Guide

Tools Needed:

- 10mm Socket Wrench
- Philips Screw Driver

Contents:

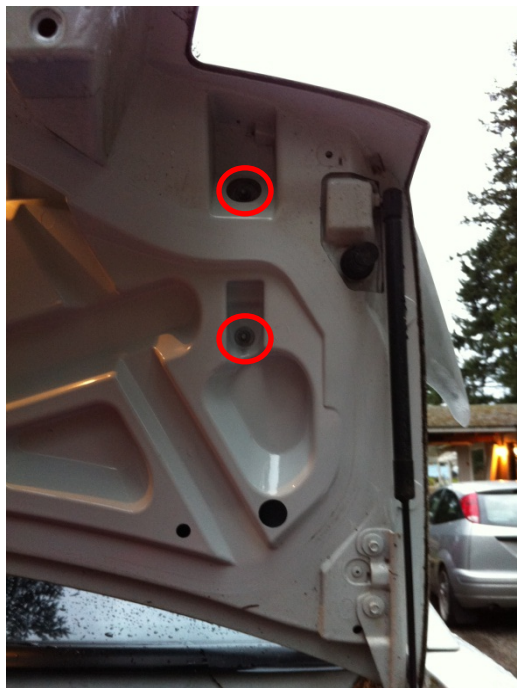

- 1 Rear Spoiler
- 2 Foam Rubber Gaskets
- 4 Screws
- 4 Washers

Installation Time : 15-30 minutes

Note: This install guide is for 01-04 Mustangs, or mustangs with pre drilled holes.

Installation Instructions

1. Open the trunk to your car

2. Use the 10mm socket wrench to unscrew the bolts on the inside of the trunk that secure the current spoiler

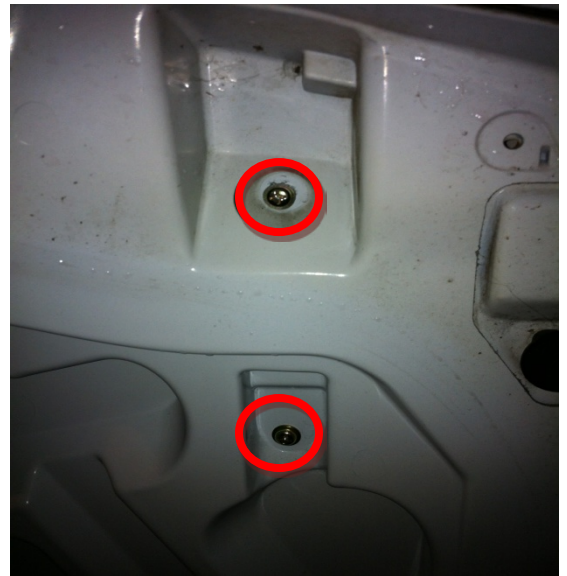

3. Remove the current spoiler. Make sure someone is holding the spoiler so it doesn't fall and damage your rear window. (This is a great time to clean the hard to reach areas underneath where the spoiler will go.)

4. Remove the release paper to reveal the adhesive side of the rubber gaskets and place them on

the underside of the spoiler. (Make sure to line up the screw holes in the spoiler with the holes in the rubber gasket.)

5. With the trunk open, align the spoiler with the drilled holes in your trunk.
6. With someone holding the spoiler in place, screw the spoiler into the trunk with the provided screws and washers using a Philips screwdriver.

7. After the spoiler is secured, close the trunk and ensure the spoiler won't move or become loose.
