Installation Instructions for Vinyl Grille Pillar Blackouts

Tools Required:

Spray bottle with soap & water solution
Plastic squeegee (included)
Heat Gun or Hair Dryer

Prep:

Clean car well to ensure good adhesion of the decal. Fill a spray bottle with a mixture of water and soap (we use baby shampoo), about 4 large drops per 32 oz. spray bottle of water. Be sure to install decal out of direct sunlight.

Step 1:

Thoroughly spray the grille pillar with the soap and water solution.

Step 2:

Peel the vinyl away from the adhesive backing and place it on the grille pillar as shown.

Step 3:

Using the supplied plastic squeegee, push any air bubbles out towards the edges of the vinyl.

Step 4:

Use a heat gun or hair drier to slightly heat the vinyl and wrap it around the edges of the pillar as shown.

Leave several hours, depending on climate, of dry time before cleaning car. Use a quick detailer in a spray bottle for the initial cleaning then hand wash car as needed at least several days for the first time after drying. ***Do not power wash vinyl or wax vinyl.***
