

Mirror Projection

Lens Tint

Step 1: Clean lens area of the mirror to remove any dirt or grease that would impede the adhesive from sticking.

Step 2: Carefully remove one tint from backing. Placing the flat side to line up with the edge of the lens.

Step 3: place tint on the lens pressing firmly only after you are sure it is aligned. The tint can be repositioned if needed before final pressure is applied.

Locating and placing of lens tint
