## 2015+ FORD MUSTANG

Cool White Running Light

Amber Turn Signal

### SWITCHBACK TURN SIGNAL LED KIT

- ▶ Upgrade to an all-LED, cool white modern appearance
- ▶ Fits all models, including EcoBoost, V6, GT, and GT350
- ▶ 100% Plug-and-Play Installation
- ▶ Functions as white running light and amber turn signal

**Included in Kit:** Two (2) switchback front turn signal bulbs  
Two (2) white front sidemarker bulbs

When the switchback bulb is on as normal, with your headlights, it shines a nice, pure white color. Anytime you activate the turn signals, it flashes bright amber. Two colors in one bulb, for an awesome lighting effect! Additionally, you can swap out your stock amber sidemarker for cool white.

*Due to the circuit design of the 2015 Mustang, you do not need resistors to slow down blinking speed. Your indicator in the dash will blink at a different rate, but your exterior turn signals will always blink at the standard speed.*
