Thank you for purchasing our 2015-17 Ford Mustang iPad Mini/Nexus 7 kit.

Below are a couple videos that will help you with installation.

Since these videos, we have added a cutout in the back of the kit for charging capabilities. If you'd like the tablet to charge while in the dash, you must remove the face of the radio and install the cable between the side of the dash and the radio face. It will be a short run of cable and may be a better solution if you plan on leaving the tablet in the dash, as opposed to taking it in and out frequently.

If you have only purchased the kit itself (without the wifi camera device), this video shows how to install the kit:

<http://youtu.be/FDBQIXd5nqU>

If you have purchased the wifi camera transmitter, here's an installation video with the Sync system:

\*\*\*NOTE\*\*\* if you have the regular radio without sync, the camera wires are different. You'll be using:

White/Green as the positive for the camera RCA into the wifi device.

Brown/Violet as the negative for the RCA into the wifi device.

If you have the Sync system, use the camera wires as outlined in this video:

<http://youtu.be/2ml9jmxex8>

Once you install the wifi device, this is how you adjust your wifi settings so the camera doesn't override your Wifi/data and still allows you to use it:

<http://youtu.be/oJf8eDupJ08>

**NOTE: The dart included in the box is for easier removal of your tablet once installed!**

If you have any questions, please feel free to call me, Kevin Church, at our facility, [904-333-2322](tel:904-333-2322).

Thank you,
