

AMERICAN MUSCLE PRE-PAINTED PARTS

Installation Instructions for Painted Console Trim (05-09 Mustang)

Step 1

Pull the center console up to release the retaining clips.

Step 2

Once the center console is pulled upwards, grab the console trim from the lower rear section and pull forward to release the retaining clips. Remove the trim from the vehicle.

Step 3

Once the factory trim is removed, install the painted trim by aligning the retaining clips with the factory holes and pressing down to fully seat them.

Step 4

Repeat Steps 2-3 for the opposite side trim. Once both painted console trim pieces are installed and fully seated, press down on the console to re-seat the retaining clips. This completes the installation of your Painted Console Trim from American Muscle.
