

Installation & Care Instructions

RV SeatGloves are universal fit for most motorhome driver and front passenger seats. Installation and removal is easy. Do NOT install SeatGloves over side impact airbags or seat controls.

STEP 1

Install the seat back portion first. Pull it down over the top of the seat, adjusting the fit while installing.

STEP 2

Adjust the seat back portion so its bottom edge is aligned with the bottom of the seat back. Insert bolster pillow in fold of seat.

STEP 3

Connect the two buckles on the rear once the cover is completely on. Adjust the straps as needed.

STEP 4

Slide the armrest covers on to the desired position.

Wash your SeatGloves seat protectors in a conventional washing machine, using cold water and a gentle cycle setting.

Dry the seat protectors using an "air" or "low heat" setting on a standard style tumble dryer. They may also be line dried, weather conditions and temperature permitting.
