Installation Instructions for 05-10 GT Throttle Body Spacer

STEP 1

Remove air intake to gain access to throttle body.

STEP 2

Once you have access to throttle body, remove two 8mm bolts (top) and two 10mm bolts (bottom) securing throttle body to upper intake plenum.

STEP 3

Pull throttle body away from the plenum and slide in the spacer and supplied gasket. Make sure the gasket goes on the throttle body side as shown.

STEP 4

Re-install the throttle body to the plenum with the supplied bolts. Re-install your air intake to complete the installation.
