

Billet Headlight Switch Installation Guide

The below installation instructions work for the following products:

- 1994-2004 Ford Mustang Headlight Knob

This installation can pose a problem for those who don't know how to remove the headlight knob. Ford uses a locking tab in order to secure the knob. Once the tab is released, you're done!

Tools Required:

- One small flathead screwdriver

Installation:

1. Take your headlight knob and pull it all the way out so your headlights are turned on.
2. If you look on the side you will see that there is a small tab that retains the headlight knob in the bezel. Take your flat screwdriver and push that tab in.
3. Remove your factory knob.
4. Take your new headlight knob and slide it onto the rod that is now sticking out of your interior trim.
5. Keep the post in the "ON" position (pulled all the way out). Use the supplied Allen screw and key and tighten the set screw until the knob is firmly attached to the mounting post.
