

## Mustang Lower Billet Grille (05-09 V6) - Installation Instructions

The below installation instructions work for the following products:

- **Mustang Billet Lower Grille (05-09 V6)**
- **Black Mustang Billet Lower Grille (05-09 V6)**
- **Mustang Billet Grille Combo Kit (05-09 V6 w/ cutout)**
- **Mustang Billet Grille Combo Kit (05-09 V6)**

Please read through the instructions carefully before starting this project. Take the time to get all the materials together as well as all the safety equipment.

### Note #1:

You will need an assistant to help you with this project.

### Note #2:

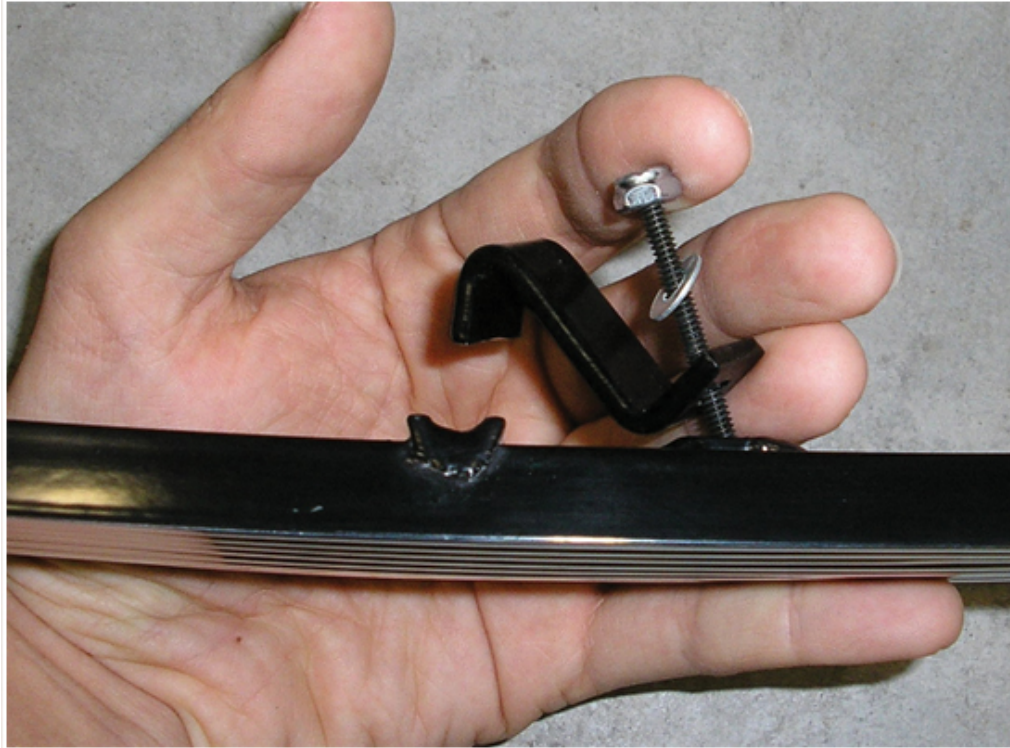

If you can access the rear of your lower grille from underneath your car without raising it, you should be able to complete this project; otherwise, you will have to lift the car.

### Tools needed:

- Small Socket and Wrench Set
- Small Phillips Screwdriver
- Droplight or Other Portable Lighting Source (Optional)
- Jack and Jackstands (Optional)

### Installation:

1. Center the grille over the bumper openings. (An extra set of hands is going to prove useful). Have your assistant hold the grille in position while you reach around the bottom and back of your lower grille.
2. Place the J-hooks on the screws. You can do this either before or after placing the grille on the vehicle (see image below for hardware order).

3. Position the grille so it is centered on your vehicle and have your assistant hold it in place. Have your assistant hold the hardware with a Phillips screwdriver.

4. From the back of the grille, position the J-hooks so they wrap around the back of the honeycomb, and so the grille is held securely in place. (See image below for a visual reference of how the J-hooks wrap around the lip.)  
**Note:** Position the hooks wherever necessary to achieve an optimum fit for your vehicle.

5. Hold the J-hooks in place and have your assistant tighten the hardware.
6. You're finished! Enjoy your new billet grille from Stack Racing.
